## About Attune RTD

Attune RTD is bringing to market a series of smart products that, by themselves, create outstanding value for consumers, resellers and utilities by optimizing existing technologies while also maximizing synergies between such technologies to further increase value.

Attune RTD is an environmentally conscious, socially responsible company providing smart products that eliminate inefficiencies, reduce energy consumption and more. The company's standards are rigorous and thorough. The products are subject to the most stringent testing and certifications. And our future is in harmony with the needs of real people and the capabilities of technology.

For Attune, it's always a matter of listening – to the needs of the marketplace and to offerings of technology only dreamed of thus far.

Founded in 2007, Attune RTD uses its patented, proprietary technologies in products designed to promote energy conservation in the new Smart Grid utility infrastructure, while maximizing potential savings in existing utility environments as well. The Company's flagship product, BrioWave(TM), conserves energy and reduces costs through a CSA certified high speed electronic control center networking the residential households Smart Meter to the HVAC unit and pool filtration pump wirelessly through its ZigBee and WI-FI interfaces. Brio Wave(TM) technology is specifically geared towards providing actionable information while working within the new Smart Meter grid application while seamlessly integrating into legacy grid systems to offer substantial immediate savings.

Attune RTD is currently working to provide Southern California Edison and other large consumer facing retail utility providers with working prototypes for test purposes.

## Recent Attune RTD News

NEW YORK, Jun 15, 2010 (BUSINESS WIRE)
