ICE Corp Announces Its Next Generation Transaction Authentication System

LAS VEGAS, March 31, 2010  
PRNewswire via COMTEX

Intelligent Communication Enterprise Corporation (OTC.BB:ICMC - News), (ICE Corp) announced that it has successfully completed the installation of its new iCEmat authentication platform. iCEmat which stands for ICE Mobile Authentication Technologies is a more advanced version of the previously known PIVOT system. The company will launch commercial operation of iCEmat in August 2010 and will host and operate the application from Singapore.

iCEmat is targeted primarily at preventing credit card fraud in 'card not present' transactions. Combined with ICE Corp's messaging platform, and the company's new iCESync application, iCEmat will also be a viable solution for electronic signature verification, order confirmation, identity theft prevention and an array of other applications where security is of high importance.
