About IDGlobal Corporation

IDGLOBAL is a Nevada based company that is diversified into Oil & Gas.

IDGLOBAL's core business growth plan calls for the ongoing development of Oil & Gas properties and refinement of cutting edge analysis and identification technologies. Additional target companies or properties may come into focus as IDGLOBAL continues to develop and grow. IDGLOBAL's growth plan calls for both further developing existing Oil & Gas properties and acquiring new licenses and properties.

IDGLOBAL currently holds a 10% Working Interest alongside Force Energy Corp (FORC.OB) and Midland based, G2 Petroleum in the Diamond Springs Prospect located in Fremont County, Wyoming. The G2 Petroleum project covers 3,000 Gross Acres with 72 drilling locations (40 acre spacing). This has shallow formations thus making it more economic to drill. 3rd Party Geological assessments state that there is the potential to recover approximately 4,000,000 of oil on the 3,000 Gross Acres. Additionally, IDGC currently is under a LOI with a Midland based E&P entity to acquire a 56.25% Working Interest in their Lea County, NM San Simon gas re-entry prospect. Approximated Initial Production rates are estimated at 1000MCF with an overall estimated ultimate recovery of approximately 1BCF over the life of the well.

By pursuing this business model, IDGLOBAL should achieve a significant market presence by providing an aggressive plan in the Oil & Gas field additionally providing a full set of security solutions to the world's largest and most often compromised and counterfeited brand names and their parent corporations.
